

EduGenie – Brainstorming & Ideation

Phase 1: Brainstorming & Ideation

EduGenie is planned as an AI-powered educational learning assistant for students. The brainstorming phase identifies the main learning problems to address and the core features to be developed.

Problem Identification

- Students may need quick explanations for difficult concepts.
- Students may need concise summaries of study material.
- Students may need practice questions and quizzes.
- Students may benefit from a personalized learning path.

Proposed Solution

Develop EduGenie as a web-based learning assistant using Python/FastAPI and Google Gemini, with a simple student-facing interface for AI-assisted learning.

Initial Feature Ideas

- AI-based concept explanation
- Text summarization
- Quiz generation / practice
- Personalized learning paths
- Simple web interface for interacting with the assistant

Phase 1 Output

This document records the initial brainstorming and ideation for EduGenie. Detailed requirements, design, planning, development, testing, documentation, and demonstration are handled in the later project phases.
