

# PROJECT DOCUMENTATION

## PROJECT DEMONSTRATION

EduGenie – Google Gemini Powered Learning Assistant

### 1. Demonstration Introduction

EduGenie demonstrates how generative AI can be integrated into a web-based educational application. The implemented prototype establishes the pipeline from student input to AI-generated response.

### 2. Demo Step 1 – Open Application

Open the EduGenie webpage in a modern browser. The interface contains the project title, navigation, question input area, Ask AI button, and learning feature sections.

### 3. Demo Step 2 – Ask a Question

Enter an academic question in the Ask EduGenie textarea and submit it using the Ask AI button.

### 4. Demo Step 3 – AI Response

The FastAPI /ask endpoint receives the question, sends an educational prompt to Gemini, receives the generated text, and renders the answer in the AI Answer section.

### 5. Demo Step 4 – Other Modules

Show the Explain Simply, Generate Quiz, Personalized Learning Path, and Summarize Text interface sections.

### 6. Demo Step 5 – Output

The documentation contains output pages for Ask & Explain, Quiz & Learning Path, and Summarize Text.

### 7. Demo Result

The project provides a single interface for several learning activities and a practical foundation for extending the remaining modules.

Prepared for project documentation and academic demonstration.
